Logical Reasoning Quick Revision Notes

Prepo by Avneesh — Techniques, Shortcuts & Rules | Category: QUICK REVISION NOTES

1. Syllogisms & Venn Logic Rules

• Universal Positive (All A are B): Converse is 'Some B are A'. Does NOT imply All B are A.
• Particular Positive (Some A are B): Converse is 'Some B are A'. Universal conclusions invalid.
• Universal Negative (No A is B): Definite: 'No B is A' and 'Some A are not B'.
• Either/Or Pair Conditions: Identical subject/predicate, both false, one positive and one negative.

2. Coding-Decoding & Letter Ranks

• Forward Alphabet Ranks (EJOTY): E=5, J=10, O=15, T=20, Y=25
• Reverse Letters Rule: Sum of forward and reverse rank is always 27 (A<->Z, B<->Y, M<->N)
• Common Patterns: +1/-1 alternating shift, vowel shifts, reverse word string, split-half shifts.

3. Blood Relations & Direction Sense

• Tree Representation: (+) Male, (-) Female, (=) Spouses, (|) Parent-Child generation step.
• Direction Sense: Right turn from North is East. Right turn from West is North.
• Minimum Displacement: Pythagoras theorem: c = sqrt(a^2 + b^2)
