Logical Reasoning Quick Revision Notes

Prepo by Avneesh — Techniques, Shortcuts & Rules | Category: QUICK REVISION NOTES

1. Syllogisms & Venn Logic Rules

• Universal Positive (All A are B): Some A are B (True), Some B are A (True). All B are A (False/Indeterminate).
• Particular Positive (Some A are B): Converse is Some B are A. No universal conclusions can be drawn.
• Universal Negative (No A is B): No B is A (True), Some A are not B (True).
• Either/Or Case: Two conclusions share identical subjects/predicates, both individually false, one positive and one negative.

2. Coding-Decoding & Letter Ranks

• EJOTY Rule: E=5, J=10, O=15, T=20, Y=25 (Alphabet position benchmarks)
• Reverse Letters: Sum of positions = 27 (A <-> Z: 1+26=27, B <-> Y: 2+25=27, M <-> N: 13+14=27)
• Shift patterns: Check +1/-1 alternating, reverse word shift, and consonant/vowel independent shifts.

3. Blood Relations & Direction Sense

• Gender Representation: (+) Male, (-) Female, (=) Spouses, (|) Vertical parent-child generation branch.
• Compass Directions: Standard N, S, E, W. Right turn from North is East; Left turn from North is West.
• Shortest Displacement: Pythagoras Theorem: c = sqrt(a^2 + b^2)
